Peveril ledge is just to the east of Swanage, a nice reef area with gullies 2-15m deep. It is made up of large rocks and boulders and can be quite colourful. Rocky bottom that has eroded to create gullies, look for the cuttlefish, wrasse, crabs, anemones & plaice. This is rapid drift. Very good chance to catch your dinner!!

Dinner time: Maybe a quick BBQ if it is sunny.

Evening / Early Night, Dive 3 : 6M Swanage Pier (ALL). Cost Free.

The life here can be prolific with shoals of pollack, hundreds of spider and edible crabs, anemones with their tentacles wafting in the current and snails and hermit crabs going about their business. Towards the far end of the pier there is a bench if you need to take a seat and there are numerous girders littering the seafloor. Pier posts are covered in barnacles and kelp
